

Salary table for engineers in various disciplines

Engineering disciplines	Average monthly income	Entry requirements	Job functions	Engineering disciplines	Average monthly income	Entry requirements	Job functions
Building Services Engineer	15-18K	<p>Education: Higher diploma or above in building services or construction engineering</p> <p>Experience: 3 years or above in building maintenance services, installation, testing and commissioning</p> <p>Knowledge: Ability to liaise with government authorities, knowledge of operation of E&M systems, site coordination / HVAC work</p> <p>Language(s): Good in English and Chinese</p> <p>Personality: Highly motivated, good interpersonal skills and hands on PC knowledge</p> <p>Others: On site work</p>	<ul style="list-style-type: none"> - Installation, testing and commissioning procedures, handover and maintenance building services - Estimating electrical load demand, costing and budgeting of E&M installation work 	Hardware Engineer (R&D)	15-25K	<p>Education: Higher diploma or above in engineering disciplines</p> <p>Experience: 1-2 years working experience in hardware design of communication products</p> <p>Knowledge: Good knowledge of RF circuit design</p> <p>Language(s): Good command of English & Chinese</p> <p>Personality: Be creative and sensitive to market trends in electronic related products</p> <p>Others: Good track record in product design of electronic products</p>	<ul style="list-style-type: none"> - Designing hardware system architecture - Leading the development of product test requirements and methods - Identifying, evaluating and selecting hardware components for projects - Generating project documentation, prototype building and testing
Chemical Engineer	12-18K	<p>Education: Diploma or above in chemistry or material sciences</p> <p>Experience: 3 years working experience in a laboratory, experience in laboratory testing field</p> <p>Knowledge: Knowledge of chemicals and laboratory materials</p> <p>Language(s): Good in English and Chinese</p> <p>Travel: Frequent travel to China</p>	<ul style="list-style-type: none"> - Laboratory testing and chemical analysis - Dealing with engineering department 	Information Engineer	15-30K	<p>Education: Degree or higher diploma in computer technology</p> <p>Experience: 3-8 years of experience in IT technical support & database administration, technical problem solving, systems management</p> <p>Knowledge: Knowledge of programming language</p> <p>Language(s): Fluent in English & Chinese</p>	<ul style="list-style-type: none"> - Writing network/computer systems/data center technical documentation - Designing and implementing automated system management processes - Proposing and implementing optimal solutions for the IS infrastructure
Civil Engineer	15-20K	<p>Education: Higher certificate or above in civil/construction, building or equivalent</p> <p>Experience: 3 years experience in construction or civil works</p> <p>Personality: Initiative and ability to work under pressure, working knowledge in drawing or diving discipline</p>	<ul style="list-style-type: none"> - Liaising and follow up with developers, architects, consultants, main contractors and quantity surveyors - Monitoring the process of project - Responsible for road and drainage work, tunnel cladding and pre-cast planer construction 	Manufacturing Engineer	18-25K	<p>Education: Degree or higher diploma in engineering</p> <p>Experience: 3-8 years of experience in production manufacturing, industrial manufacturing field, project development, solving production & manufacturing problems</p> <p>Knowledge: Knowledge of MS Windows</p> <p>Language(s): Fluent in English and Mandarin</p> <p>Travel: Station in or travel to China</p>	<ul style="list-style-type: none"> - Handling projects from design to manufacturing - Optimising the efficiency of assembly lines and trouble shooting of production problems - Implementing cost reduction and productivity improvement
Control, Automation & Instrumentation Engineer	12-15K	<p>Education: Higher diploma or above in electronic or mechanical engineering</p> <p>Experience: 3 years with electronics control products with knowledge of production, materials and mold design</p> <p>Personality: Proactive, self starter and capable of working independently</p>	<ul style="list-style-type: none"> - Project management activities including project costing, scheduling and quality control - Establishing quality systems, quality function development and coordinating the generation of corrective action reports - New project development 	Material Engineer	15-23K	<p>Education: Degree or higher diploma in engineering/material sciences</p> <p>Experience: 3-8 years of experience in production & materials planning & controlling, technical support & problem solving</p> <p>Knowledge: Knowledge of MS Windows</p> <p>Language(s): Fluent in English, Mandarin and Cantonese</p> <p>Travel: Station or travel to China</p>	<ul style="list-style-type: none"> - Liaising with vendors, suppliers and factories - Developing, evaluating and testing materials used within the manufacturing process
Customer Support Engineer / Sales Engineer	12-15K / 13K+commission	<p>Education: Certificate or above in electronics engineering, computer or IT</p> <p>Experience: At least 1-2 years sales experience in electronic components or electrical installation or E&M, or 2 years IT Services support</p> <p>Language(s): Good spoken and written English, Cantonese and Mandarin</p> <p>Personality: Ability to meet deadlines, work under pressure and close deals</p> <p>Good communication, presentation and negotiation skills</p> <p>Travel: Frequent travel to China</p>	<ul style="list-style-type: none"> - Business development - Price negotiation - Recommending & selling products 	Mechanical Engineer	18-25K	<p>Education: Degree or higher diploma in engineering</p> <p>Experience: 3-8 years of experience in mechanical design, technical problem solving, project management, production</p> <p>Knowledge: Knowledge of MS Windows, Pro-E, Solidwork and Autocad</p> <p>Language(s): Fluent in English and Mandarin</p> <p>Travel: Station or travel to China</p>	<ul style="list-style-type: none"> - Undertaking project management, product development, design, manufacturing processes & product costing - Liaising with customer and vendor on technical and quality issues
Electrical Engineer	13-20K	<p>Education: Higher diploma in electrical engineering</p> <p>Experience: 3 years experience of Autocad</p> <p>Language(s): Good in English & Mandarin</p> <p>Personality: Strong coordination and interpersonal skills</p> <p>Responsible, with initiative and able to work under pressure</p>	<ul style="list-style-type: none"> - Responsible for providing electrical engineering solutions and technical advice - Involving with design plant layout and electrical installation 	Procurement Engineer	18-25K	<p>Education: Degree or higher diploma in engineering, purchasing & supply</p> <p>Experience: 3-8 years in purchasing, inventory control</p> <p>Knowledge: Knowledge of MS Windows, Sap, ERP System</p> <p>Language(s): Fluent in English & Mandarin</p> <p>Personality: Good communication & negotiation skills</p> <p>Travel: Station or travel to China</p>	<ul style="list-style-type: none"> - Sourcing of mechanical parts or components - Undertaking value analysis, cost estimation, vendor evaluation, contract negotiation
Electronics Engineer	13-20K	<p>Education: Higher diploma or above in E/E</p> <p>Experience: 2-3 years working experience in electronic consumer products</p> <p>Knowledge: Solid experience in circuit board design and C Language</p> <p>Language(s): Good in Mandarin & English</p> <p>Personality: Creative and sensitive to market trends in electronic related products</p> <p>Others: Good track record in design of electronic products</p> <p>Travel: Willing to travel and station in China</p>	<ul style="list-style-type: none"> - Product development in RF or electronic consumer products 	Project Engineer	10-15K	<p>Education: Degree in Mechanical / Manufacturing/ Electronics Engineering</p> <p>Experience: 2-5 years project follow up / product development experience</p> <p>Knowledge: Good knowledge of Autocad, Pro-E</p> <p>Language(s): Fluent in English & Mandarin</p> <p>Personality: Good communication skills</p>	<ul style="list-style-type: none"> - Project follow up & development - Trouble shooting from design to production stages - Prepare development schedule for new products
Environmental Engineer	13-20K	<p>Education: Certificate or above in environmental engineering</p> <p>Experience: 3 years or above in environmental engineering to tackle environmental problems and rectify on site</p> <p>Knowledge: Construction safety training</p> <p>Personality: Work independently, hard working, be prepared to work shift</p>	<ul style="list-style-type: none"> - Conducting weekly environmental walk with independent environment audit team - Measuring for environmental protection on the project - Dealing with environmental complaints and liaise with the EDP inspectors 	Software Engineer	18-25K	<p>Education: Degree or higher diploma in computer science</p> <p>Experience: 3-8 years of experience in software development, solving electronic problems, technical support & design</p> <p>Knowledge: Knowledge of electronics software</p> <p>Language(s): Fluent in English & Mandarin</p>	<ul style="list-style-type: none"> - Responsible for software programming, application system design, enterprise application development
Geotechnical Engineer	13-20K	<p>Education: Degree in civil engineering or corporate member of HKIE or ICE</p> <p>Experience: 3 years or above in civil/geotechnical engineering work</p>	<ul style="list-style-type: none"> - Responsible for supervision and quality control of earthworks including fill compaction and temporary drainage and excavation works 	Structural Engineer	18-25K	<p>Education: Degree or higher diploma in structural/building engineering</p> <p>Experience: 3-8 years of experience in structural design, technical problem solving</p> <p>Knowledge: Knowledge of MS Windows & Autocad</p> <p>Language(s): Fluent in English & Mandarin</p>	<ul style="list-style-type: none"> - Undertaking technical liaison between engineering, procurement and construction - Implementing building design codes, technical specification writing and standards development
				Testing Engineer	10-15K	<p>Education: Degree in Engineering/ QA</p> <p>Experience: 2-5 years of quality control & testing experience</p> <p>Knowledge: Good Knowledge in safety standards</p> <p>Language(s): Good English, Mandarin and Cantonese</p>	<ul style="list-style-type: none"> - Test products according to requirements - Prepare test report, test procedures and test schedule
